DETAILED ACTION

Due to the complex nature of the claims, no request for an oral election is being made. Please MPEP 812.01.

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

SPECIES (1) dedimethylaminotetracycline derivatives of claim 4, 5, claim 21, 22;
SPECIES (2) the tetracycline derivatives set forth in claim 6-10, claim 23-27; SPECIES (3)
STRUCTURES A-P. Applicant is respectfully requested to elect a single species within
SPECIES (1) or SPECIES (2) or SPECIES (3). For example, if SPECIES (3) is elected, then
within SPECIES (3), structure C is elected.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 1614

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:
claims 4, 5 (dedimethylaminotetracycline derivatives)
claims 6-10 (tetracycline derivatives)
claims 15-17 (Structures A-P)
claims 21,22(dedimethylaminotetracycline derivatives)
claims 23-27(tetracycline derivatives)
claims 32-34 (Structures A-P).

The following claim(s) are generic: claims 1 and 18.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the compounds within SPECIES (1)-(3) are drawn to structurally and chemically distinct products and the search for one species is not required for the other.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1614

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
